TITLE: Preparing stanol fatty acid ester(s)  
mixtures -

comprises in-esterification of  
hardened sterol fatty acid  
ester(s) for use in food products  
e.g. low fat spreads

ABSTRACTED-PUB-NO: EP 897970A

BASIC-ABSTRACT:

A process for the preparation of stanol fatty acid esters mixtures by inesterification of stanol fatty acid esters starting material is new and comprises reacting (at least 50%) saturated fatty acid groups of starting material with a source of at least one fatty acid moiety containing at least 35% (especially 45%) polyunsaturated fatty acid (PUFA) groups.

USE - The stanol fatty acid esters are useful for producing food products (claimed), especially fat based food products to obtain lower blood cholesterol effects e.g. low fat spreads.

ADVANTAGE - The process is carried out in the absence of a solvent (claimed) and therefore is more environmentally friendly and is more cost effective as it requires less raw materials, equipment and labour.

ABSTRACTED-PUB-NO: US 6106886A

EQUIVALENT-ABSTRACTS:

A process for the preparation of stanol fatty acid esters mixtures by inesterification of stanol fatty acid esters starting material is new and comprises reacting (at least 50%) saturated fatty acid groups of starting material with a source of at least one fatty acid moiety containing at least

35% (especially 45%) polyunsaturated fatty acid (PUFA) groups.

USE - The stanol fatty acid esters are useful for producing food products (claimed), especially fat based food products to obtain lower blood cholesterol effects e.g. low fat spreads.

ADVANTAGE - The process is carried out in the absence of a solvent (claimed) and therefore is more environmentally friendly and is more cost effective as it requires less raw materials, equipment and labour.
